

***Interested in a career with a company engaged in cutting edge drug discovery? Then we would like to hear from you.***

***Celentyx Ltd is a growing pharmaceutical R&D company based in Birmingham and is seeking to expand its research operations.***

## **Two Research Scientist positions**

**Salary: To be agreed based on experience. Benefits will also include share options and bonuses.**

An exciting opportunity has arisen for two Research Scientists to work within Celentyx Ltd, a spin-out company from the University of Birmingham Medical School.

The successful candidates will work on the discovery and development of drugs that impact the human immune system, typically studied as human PBMC preparations or purified subsets.

Applicants with relevant practical experience and proficiency in performing *in vitro* experiments using human primary cells are particularly encouraged to apply.

The applicants should have a BSc/BMedSc in Immunology, Molecular or Cellular Biology, Pharmacology or a related subject (or equivalent experience). At least one of the posts may be suitable for a newly-qualified post-doctoral scientist.

If applicable, graduates will be encouraged to apply for a part-time higher degree (MPhil/PhD) with the University of Birmingham.

Informal enquiries and applications (CV and covering letter) should be addressed to Dr Catherine Brady (catherine.brady@celentyx.com).

**For more details about the company, please visit [www.celentyx.com](http://www.celentyx.com).**
